SERVICE SUMMARY: ACTUAL ENERGY HOURLY

The Actual Energy Hourly Customer rate will be either the Real-Time or Day-Ahead Locational Marginal Price, or a combination thereof, plus all additional energy costs associated with serving the Customer including but not limited to (system congestion costs, capacity, NCPC, ancillary, wholesale transmission and distribution and all costs incurred for the purchase of energy from ISO-NE), line losses, RPS and similar state programs, plus Company costs and margin. Capacity will be charged based on Customer's ICAP tag as defined by the Utility/LDC. Some of these rate elements will be averaged into separate billing categories and adjusted from time to time as needed to match Company's true-up final costs to serve Customer. Hourly kWh usage will be determined using Customer's actual hourly meter reading provided by the Utility when available, or the Utility standard load profile when Customer does not have an hourly meter, or Utility hourly information is not available.

Electric Supply Agreement

ENROLLMENT INFORMATION

To assist Company in making best efforts to enroll Customer's accounts in a timely fashion, please indicate current supplier contract end date (if not on Utility default service):

Existing Supplier End Date:

Desired Start Month:

Number of Accounts:

Customer has read and agrees to the provisions contained in this Agreement, including the attached and expressly incorporated Terms of Service and Attachments. Customer authorizes Actual Energy to enroll Customer with its Utility as Customer's Competitive Electricity Provider. Customer understands that it may only designate one company as its Competitive Electricity Provider for each account and that there may be a fee charged by its current Competitive Electricity Provider to switch to Actual Energy. By signing this Agreement and/or accepting Generation Service, the individual undersigning below warrants and represents that he/she is legally authorized to enter into this Agreement on behalf of Customer.
